### 1. Introduction

Today COVID-19 pandemic is deadly big that we cannot imagine who and world scientists fail to search proper medicine or substitute since the 6th month and till now about 4,36 lakhs known death taken place in the world according to Dainik Bhaskar Daily newspaper India.

The reason behind it that we are bound by the law system that we cannot give any medicine or substance without the approval of WHO and other comportsing authorities. World's scientist is working in older pattern to search substitute but they did not want to take new medicine because it needs to go very long process and go through proper channels it is a very lengthy process and time-consuming [1-4]. Now no law and technic ready to save lives. My article of Treatment of COVID-19 by bile juice publish in a medical journal and I sent my method of treatment to many Govt. & health departments. We know that Virus develops in plants animals, birds, and humans' bodies. Now COVID -19 is a pandemic and many people are dying with each passing day and the number of patients is increasing every hour.

### 2. Types of Corona Viruses

#### A. Common Corona Viruses: -

- a. 229E (alpha)
- b. NL63 (alpha)
- c. OC43 (beta)
- d. HKU1 (beta)

#### B. Less Common Corona Viruses: -

- a. MERS-COV (beta)
- b. SARS-COV (beta)
- c. SARS-COV-2 which causes COVID-19

### 3. Structure of COVID-19

It is a composite protein/glycan shield by cryo. (Spike Protein)

### 4. Mode of action

As we know that COVID-19 affects our mouth, nose, neck, lungs, blood, heart, and kidney. It's weak our immunity through the blood.

I want to share a natural method to cure CoVID-19 and boosts immunity by bile juice.

### 5. Material & Method

As we know that it is shield by proteins and glycan and bile juice secret in the duodenum by nature its function is to break the protein and fats (emulsify) and supports digestion in the small intestine and Ethyl alcohol/rectified spirit have the capacity to absorb all ingredients and protect to be waste. If we use this combination, then people will get strength and bile juice works as stem cells and rapidly runs in the blood. It helps in reducing blood sugar levels and fats in the blood as it boosts functions of Pancreas, liver, and correct metabolism. Bile juice produces in every living creature and produced by the liver and no harm full substance present in it. Bile juice contains deoxycholic acid that breaks the COVID-19 DNA & mRNA without harm of human DNA & RNA.

### 6. Process

Take any healthy animal; birds and fish chopped bile juice and mixed it with 10% Bile juice and 90% ethyl alcohol/rectified spirit or 10% bile juice and 90% corn syrup and shake well in a bottle and keep it for 12 hrs and after 12 hrs all particles will sit at the bottom and we can use 5 to 15 drop upper site extract by oral admission and repeated dose along with other drugs, it can develop immunity.it is the best tonic in the World.

### 7. Result

I found that its cure blood clotting factors, liver disease, allergy, virus, bacteria, and many blood-related diseases. It is my humble request to the WHO and every Government and private agency to experiment on this topic and save the world by COVID-19.

Fig. 1

Fig. 2

## 8. Conclusion

I used it and found a very good result. I also know some herbal plant that can cure COVID-19.

**Note-** We can use the above method. It will give results in five minutes. Although the taste is bitter it is lifesaving and vaccines can be made using bile juice purified liquid.
